ABOUT AS

EPM is a leading manufacturer of LV Electrical panels. Our company is professionally managed with over-qualified, experienced, and trained personnel, modern equipment and state of the art production facilities. We started out as a small assembly unit in 2016, building a sturdy reputation over the years and an infrastructure to take pride in Today.

WHO WE ARE ?

EPM is a company with an area exceeding 2000 sqm.
We manufacture, test and are successfully commissioned in all kinds of LV panels, up to 6300A ratings.
Our strength lies in our prompt and precise delivery and in our client satisfaction at every stage.
EPM has been recognized as one of the reputable certified Panel builder and Manufacturer's representative in the Egyptian market since its formation in 2016.
The company has enjoyed steady growth since its startup and has successfully satisfied many needs of our customers>

Egyptian Panel Manufacture

WHY US

Over the years we have been acknowledged to be one of the leading companies in designing, supplying, installing, commissioning of industrial panels, automation solutions and software's for a wide variety of industries. Excelling our services we earned a certificate from Schneider as Panel builders. We always strive to be the best in our field, and always dedicated to provide our customers high quality service at the best cost.

Vision

Delivering the most optimal quality control systems using the most advanced components in building our systems and upgrading our software and hardware utilities. Parallel to providing high levels of training for our team to broaden their knowledge and excel new skills.

Mission

We started with a mission to manufacture and supply quality LV panel.
We have designed and manufactured various kinds of LV panels to custom requirements, employing cost effective measures in the design and manufacturing of the panels in order to maintain competitiveness.

PRODUCTS

- LV panels (up to 6300A)
- LV PFC panels (normal and detuned)
- Harmonic solution
- Control panels (PLC)
- Generators Synchronization
- Stainless steel panels IP 66 (certified)
- Power Quality Products
- Final Distribution Panels, and Control Panel

MAIN DISTRIBUTION PANEL

up to 6300 A guarantee accurate protective system with ease of installation

SUB MAIN DISTRIBUTION PANEL

A sub-main distribution panel is a smaller service panel that enables power distribution to specific areas of your building or home.
It is connected to the main panel via a circuit feeder and has its own fuses and breakers.
It is used to control and monitor energy distribution in smaller.

PRODUCTS

SYNCHRONIZATION PANEL

A synchronization panel is a device that controls the operation of two or more generators or breakers to ensure they operate in sync.
It can adjust the voltage, angle, and slip of the Generators or breakers to match the load demand.
It can also monitor the performance of the generators or breakers and provide feedback to the operator.

PRODUCTS

AUTOMATIC TRANSFER SWITCH

Automatic Transfer switch an automatic transfer switch (ATS) is a device that automatically switches between two or more power sources to provide backup power to a connected load circuit.

It can detect the failure of the primary power source and transfer the load to the alternate power source, such as a generator or a utility feed.

It can also restore the load to the primary power source when it is restored.

POWER FACTOR PANEL

A power factor panel is a device that improves the power factor in electrical systems by reducing the reactive power consumption and increasing the active power output.

It can help reduce the losses, improve the efficiency, and lower the cost of electricity.

It can also protect the equipment from overloading and damage by regulating the voltage and current.
